SUMMARY	As a software engineer, I love solving problems with well-architected and well-tested software using test driven development and paired programming. I prefer the back end of the stack, and feel most comfortable Springing into action writing microservices. Automating mundane processes is a hobby of mine, like the creation of this very document!	
EXPERIENCE	<b>Duke Energy, Senior Software Engineer</b> <a href="https://www.duke-energy.com">https://www.duke-energy.com</a>	October 2017 — Present
	<ul style="list-style-type: none"><li>◦ I'm responsible for the back end of our customer mobile app, mentoring fellow software engineers, and synthesizing both business and technical requirements</li><li>◦ Currently lead back end development for Duke Energy's customer mobile app</li><li>◦ Scaled customer mobile app's back end to support more than 1,000,000 customers</li><li>◦ Pioneered replatforming effort to rewrite monolithic legacy services as Spring Boot microservices</li><li>◦ Developed API layer for customer product recommendation engine</li><li>◦ Advocated for test driven development and use of testing frameworks</li></ul>	
	<b>Revature, Software Developer</b> <a href="https://revature.com">https://revature.com</a>	August 2016 — October 2017
	<ul style="list-style-type: none"><li>◦ At Revature, I learned about software development while honing in my skills through hands-on projects</li><li>◦ Worked on multiple projects to showcase budding development skill</li><li>◦ Presented technical solutions</li></ul>	
	<b>UNC Office of Institutional Research and Assessment, Student Worker</b> <a href="https://oir.unc.edu">https://oir.unc.edu</a>	May 2015 — August 2016
	<ul style="list-style-type: none"><li>◦ As a student worker, my role was initially to oversee and manage the digital accreditation report for UNC. Over time, I realized my proclivity for software development and found myself working on various software projects</li><li>◦ Built tool to upload accreditation evidence and track approval status</li><li>◦ Managed HTML copy of accreditation report</li><li>◦ Created tool to translate addresses into latitude and longitude coordinates using Google Maps API</li><li>◦ Devised reproducible method to rename multiple files at once using Powershell</li></ul>	
EDUCATION	<b>UNC Chapel Hill</b> Bachelor of Science in Information Science	August 2014 — May 2016
	<ul style="list-style-type: none"><li>◦ Foundations of Information Science</li><li>◦ Web Development</li><li>◦ Information Ethics and Privacy</li><li>◦ Mobile Web Development</li><li>◦ Introduction to Database Concepts and Applications</li><li>◦ Python Development</li></ul>	
	<b>Appalachian State University</b>	August 2012 — May 2014
SKILLS	<b>Back End Development:</b> Microservice Architecture, Modular Monolithic Architecture, Java, Spring, JUnit, Mockito <b>Front End Development:</b> HTML5, CSS, Angular, Angular Material Components, Karma, Protractor	

**Automation Tools:** Bash scripting, Python, Concourse CI, Github Actions, Jenkins

**Software Development Methodologies and Techniques:** Test Driven Development, Paired Programming, Scrum, Devops, CI/CD
